

Advancing better™

Stable demand and unchanged profitability

- Demand remained on a stable but low level in the third quarter.
- The operating margin was 17.6 percent despite lower volumes. Tangible effects from short term cost savings program.
- Continued good cash flow resulted in a low net debt.
- A public tender offer for all shares in Neles published on July 13. The acceptance level condition revised from 2/3 to >50 percent on October 15.

Outlook for the fourth quarter

"We expect demand in the fourth quarter to be somewhat higher than in the third quarter."

Earlier published outlook (July 21, 2020): "We expect demand in the third quarter to be somewhat lower than in the second quarter."

The Q3 2020 report has been reviewed by the company's auditors, see page 26 for the review report.

Summary

Comment from

Tom Erixon

President and CEO

"After the exceptional uncertainty regarding the macro economic situation in the second quarter, demand remained on a stable but low level in the third quarter. Compared to the previous quarter order intake was marginally weaker and in line with our expectations. The demand was stable to positive in most end markets in the Food & Water Division. The increased investments in energy efficiency applications could not fully compensate for a continued weak demand in the oil & gas sector.

The operating margin of 17.6 percent was largely unchanged compared to last year despite lower volumes. The short term cost savings program continued to deliver ahead of plan in all three divisions and savings amounted to SEK 225 million in the quarter. Also cost of quality continued to decrease, especially for larger engineering projects. This has been a key factor in the improved margin trend for the Food & Water Division, reaching 19 percent in the third quarter. The strong cash flow during the first nine months 2020 has resulted in a considerably lower net debt.

At the current demand level, the negative effects from the COVID-19 pandemic has resulted in some structural imbalances in the group. As we gradually move away from the short-term savings program and return to a more normal operational mode, a targeted restructuring program is under preparation. The details of the program will be announced latest in connection with the Q4 report.

In the third quarter Alfa Laval launched a public offering for all shares of Neles, a publicly listed company in Finland with a global position in several industrial flow end-markets. After the third quarter ended Alfa Laval modified the acceptance level condition from a 2/3 acceptance level to above 50 percent. This change reflects the strategic importance of Neles as a future growth platform for Alfa Laval. The Board of Directors of Neles have recommended the modified offer to the shareholders. The acceptance period expires on October 30."

Tom Erixon, President and CEO

Financial overview

Order intake

Orders received was SEK 8,935 (10,728) million in the third quarter and SEK 30,561 (32,966) million in the first nine months 2020. Cancellations of orders were lower during the third quarter 2020 than the corresponding quarter last year.

Orders received from Service constituted 30.3 (30.4) percent of the Group's total orders received during the third quarter and 29.4 (28.9) percent during the first nine months 2020.

Excluding currency effects and adjusted for acquisition and divestment of businesses the order backlog was 8.2 percent lower than the order backlog at September 30, 2019 and 0.8 percent lower than the order backlog at the end of 2019.

Net sales

Order backlog

Net invoicing was SEK 9,728 (12,056) million for the third quarter and SEK 30,773 (33,553) million for the first nine months 2020.

Net invoicing relating to Service constituted 28.5 (25.4) percent of the Group's total net invoicing in the third quarter and 28.2 (26.7) percent in the first nine months 2020.

* Alternative performance measures. ** Excluding comparison distortion items.

The gross profit has been affected negatively by a lower sales volume and the product mix in capital sales.

Sales and administration expenses were SEK 1,368 (1,676) million during the third quarter and SEK 4,486 (5,117) million during the first nine months 2020. The figures for the first nine months corresponded to 14.6 (15.3) percent of net sales. Excluding currency effects and acquisition/divestment of businesses, sales and administration expenses were 12.9 percent lower during the third quarter and 9.9 percent lower during the first nine months 2020 compared to the corresponding periods last year.

The costs for research and development during the first nine months 2020 corresponded to 2.5 (2.4) percent of net sales. Excluding currency effects and acquisition/divestment of businesses, the costs for research and development decreased by 14.7 percent during the third quarter and 3.1 percent during the first nine months 2020 compared to the corresponding periods last year. The decrease in the quarter is explained by an overall lower activity level due to the COVID-19 pandemic.

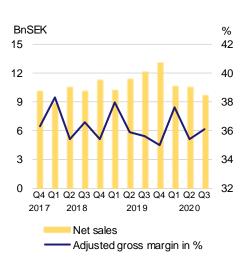

Earnings per share was SEK 7.14 (9.69) for the first nine months 2020. The corresponding figure excluding amortisation of step-up values and the corresponding tax, was SEK 8.40 (11.18).

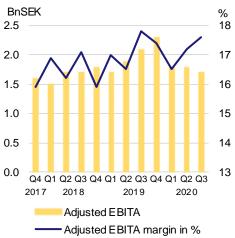

Comparison distortion items

| | C | 3 | Jan | Sep | Jan-Dec | Last 12 |
|---|------|------|------|------|---------|---------|
| SEK millions | 2020 | 2019 | 2020 | 2019 | 2019 | months |
| Other operating income Comparison distortion income | - | -5 | - | 191 | 260 | 69 |

The comparison distortion cost in 2020 is relating to the realized loss at divestment of the operations in DSO Fluid Handling Inc in the U.S.

The comparison distortion income in 2019 was relating to a realised gain at the divestments of part of the air heat exchanger business related to commercial/industrial air heat exchangers in the Greenhouse division to the LU-VE Group. The comparison distortion cost in 2019 was relating to a realised loss at the divestments of the last remaining Greenhouse operation

4

shell-and-tube Sarasota, also known as Alfa Laval Champ, to Thermal Solutions Manufacturing.

Consolidated financial net and taxes

The financial net for the first nine months 2020 was SEK -144 (-140) million, excluding realised and unrealised exchange rate losses and gains. The main elements of costs were interest on the debt to the banking syndicate of SEK -3 (-3) million, interest on the bilateral term loans of SEK -27 (-37) million, interest on the corporate bonds of SEK -64 (-66) million and a net of dividends, changes in fair value and other interest income and interest costs of SEK -50 (-34) million. The net of realised and unrealised exchange rate differences was SEK -349 (340) million.

The tax on the result after financial items was SEK -344 (-460) million in the third quarter and SEK -1,037 (-1,277) million in the first nine months 2020.

Cash flow

During the first nine months 2020 cash flows from operating and investing activities were SEK 4,483 (2,308) million.

Depreciation, excluding allocated step-up values, was SEK 800 (683) million during the first nine months 2020.

Acquisition of businesses during the first nine months 2020 with SEK -18 (-61) million is relating to acquisition of a smaller operation in the Netherlands, WCR Benelux BV, with SEK -10 (-) million and payment of withheld purchase price for the acquisition of Airec with SEK -8 (-61) million.

Divestment of businesses during the first nine months 2020 with SEK 125 (374) million is relating to divestment of the operations in DSO Fluid Handling Inc with SEK 6 (-) million, payment of withheld purchase price for the sale of the commercial/industrial air heat exchangers business to the LU-VE Group with SEK 101 (-) million and the sale of Alfa Laval Champ to Thermal Solutions Manufacturing with SEK 18 (-) million.

Organisational change

As of January 1, 2020, the product groups within Operations have been moved over to the Business Units within the Divisions. This gives the Business Units a clearer financial consolidation as a part of a more decentralised business organisation. Due to this the comparison figures for previous periods have been restated, which has impacted depreciation and amortisation, investments, assets, liabilities and number of employees by division. Remaining in Operations is procurement, logistics, distribution and production development.

The depreciation and amortisation that have been moved from Operations to the Divisions in the comparison periods have not impacted the operating income in the Divisions.

- The green energy transition drives demand in HVAC and refrigeration.
- The investment activity in the hydrocarbon chain continues on a low level, except for • China.
- Service was negatively impacted by lower activity levels in the oil & gas business. ٠
- Improved operating margin as a result from good cost control and positive mix. ٠

Energy Division

The division targets customers in oil and gas extraction, oil and gas processing and transport, refinery, petrochemicals and power generation, but also construction related applications such as heating, ventilation and cooling and in the mining and metal industries and lighter industries.

Focus is increased energy efficiency and sustainable solutions.

Quarterly development

Order intake Jan-Sep 2020 split per end market/business unit

Petrochemicals 14%

Order intake*

The Energy Division's overall order volumes declined compared to the third quarter 2019.

The order intake in HVAC (Heating, Ventilation & Air Conditioning) and refrigeration declined, but the base business** was flat, driven by the green energy transition. The investments in parts of the oil & gas market were still low. The COVID-19 pandemic and falling oil prices have lowered activities in drilling and production of gas and oil. In refinery and petrochemicals, there is also a lower order intake, but the drop is significantly smaller. The underlying business in petrochemicals was on a higher level than in the third quarter last year, due to demand from mainly Chinese customers.

Lockdown and low activities among some large oil & gas customers reduced the order intake for service compared to the same quarter last year.

Net sales

Net invoicing was down compared to the third quarter last year, following lower deliveries to oil & gas customers, whereas net invoicing to other customers remained overall flat.

Operating income

The effect on operating income from the drop in net sales is partly compensated for by a positive mix and lower overhead cost. The latter were down following the ongoing savings programme.

Food & Water Division

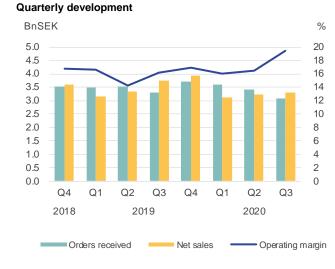

The division offers different types of products for heat transfer, separation and hygienic fluid handling and targets customers in food, pharmaceuticals, biotech, vegetable oils, brewery, dairy and body care products. In addition, the division focuses on public and industrial water treatment as well as wastewater and waste treatment.

- Overall demand increased somewhat compared to the same quarter last year. ٠
- All end markets developed better than expected, however project business still slow.
- Service was stable in the quarter. ٠
- ٠ Strong operating income due to good cost control, factory productivity and low quality costs.

Order intake Jan-Sep 2020 split per end market/business unit

Order intake*

The division's order intake increased somewhat compared to the third quarter last year. Geographically, Europe, Asia and Latin America overall showed growth, whereas North America contracted.

The pharma and biotech market continued to show a solid growth, driven by China and Western Europe. Order intake from the water industry continued to develop favourably, where the strongest increase was seen in Europe. Order intake from the edible oil industry grew at a strong pace, across all geographical regions. Order intake in dairy saw a minor contraction, with Americas as well as Asia declining whereas Europe overall grew. The brewery sector also declined, due to a continuing negative impact from COVID-19. Ethanol, starch & sugar declined, with the largest decline in starch. The ethanol industry was down slightly due to the competition from low crude oil prices. Protein showed strong growth.

The demand in service was slightly lower than last year. The order intake for service offerings has during the year been negatively affected by the limited access to customer sites caused by COVID-19, but an increased activity was noted in the quarter.

Net sales

Net sales in the quarter was below the same quarter last year. A slight decline was seen in capital sales whereas service was unchanged, leading to a favourable mix change.

Operating income

The operating income increased compared to the corresponding period last year despite lower net sales. A favourable product mix and a strong loading in the factories contributed positively. In addition, the costs were lower than last year, due to low quality costs and the savings program initiated during the COVID-19 pandemic.

Marine Division

The division's customers include shipowners, shipyards, manufacturers of diesel and gas engines, as well as companies that work with offshore extraction of oil and gas. The offering includes pumping systems, boilers, heat transfer equipment, high speed separators and several different environmental products, including systems to clean ballast water and exhaust gases.

- Order intake continued on a low level, although 6 percent up sequentially.
- Expected recovery in ship contracting expected to be delayed.
- Service onboard negatively affected, however spare parts stable in the quarter.
- Operating margin negatively affected by mix, mainly driven by environmental products.

Order intake Jan-Sep 2020 split per end market/business unit

Order intake*

Order intake for the Marine Division was lower than the third quarter last year, but somewhat higher than the previous quarter.

General demand for equipment tied to the building of new vessels was on a lower level than the same period last year. The order intake for offshore increased in the quarter compared to the corresponding period last year due to a number of large orders for pumping systems. The underlying market sentiment however remains weak due to the contraction in oil price since the beginning of March this year. The demand for Alfa Laval's exhaust gas cleaning systems was unchanged compared to the third quarter last year. Demand for PureBallast was lower than the same period last year, due to COVID-19 related extensions and delays. Products going into onshore engine power applications saw a lower demand compared to the same period a year ago as the industry moves to smaller sized flexible engine power to augment power from renewables.

Order intake for service declined compared to the same quarter last year as lower vessel utilization levels reduced the demand for spares and continued travel restrictions limited on-board service.

Net sales

Net sales decreased compared to the third quarter last year, primarily because of decreased invoicing for exhaust gas cleaning systems. The decrease also affected most other product areas, except ballast water systems that had a slight increase.

Operating income

A less favourable product mix in capital sales had a negative result impact and added to the negative volume effect. The overall cost level was lower than the same quarter a year ago mainly due to cost saving initiatives linked to COVID-19.

* At the end of the period. ** In management accounts. *** Excluding new leases.

Comparison figures for previous periods have been restated due to the organisational change described on page 5.

The order intake and net sales 2019 for Operations and Other is relating to contract manufacturing of shell and tube heat exchangers for BITZER after the sale of the business to BITZER. The lower operating income is mainly due to central provisions.

Information about products and services

| Net sales by product/service * | Q3 | | Jan-Sep | | Jan-Dec | Last 12 |
|--------------------------------|-------|--------|---------|--------|---------|---------|
| SEK millions | 2020 | 2019 | 2020 | 2019 | 2019 | months |
| Own products within: | | | | | | |
| Separation | 1,614 | 1,961 | 5,022 | 5,471 | 7,677 | 7,228 |
| Heat transfer | 4,076 | 4,817 | 12,193 | 13,438 | 18,694 | 17,449 |
| Fluid handling | 2,097 | 2,550 | 6,865 | 7,814 | 10,361 | 9,412 |
| Marine environmental | 1,138 | 1,763 | 4,141 | 4,175 | 5,802 | 5,768 |
| Other | 1 | 9 | 1 | 16 | 78 | 63 |
| Associated products | 317 | 387 | 970 | 1,036 | 1,569 | 1,503 |
| Services | 485 | 569 | 1,581 | 1,603 | 2,336 | 2,314 |
| Total | 9,728 | 12,056 | 30,773 | 33,553 | 46,517 | 43,737 |

* The split of own products within separation, heat transfer and fluid handling is a reflection of the current three main technologies. Marine environmental is a growing new product area basically outside the main technologies. Other is own products outside these four product areas. Associated products are mainly purchased products that compliment Alfa Laval's product offering. Services cover all sorts of service, service agreements etc.

New products during the third quarter

During the third quarter Alfa Laval has introduced among others the following new products:

Alfa Laval PureBallast Compliance Service Package

Ballast water treatment is a global environmental requirement for marine vessels. Alfa Laval PureBallast 3 is one of the market's leading treatment solutions, yet the application involves more than installing a system and switching it on. The regulations demand not only discharge performance, but also system inspections, function checks, calibrations and

crew training to ensure the system fulfils the requirements. Our latest service launch, the PureBallast Compliance Service Package, lets Alfa Laval service engineers take responsibility for the health of a customer's PureBallast systems. Doing so takes work and worry off the customer's shoulders, providing cost-effective assurance of meeting regulatory demands.

Alfa Laval AlfaNovaTW

Alfa Laval AlfaNovaTW is a new product range for safe and clean tap water duties. It is the first 100 percent stainless steel heat exchanger to address the challenge with contaminated tap water. The new heat exchanger eliminates the risk of unsafe drinking and tap water due to metal release from equipment made of nickel and copper. Limiting heavy metal contamination in drinking water is critical for public health and required by law in many jurisdictions. As many of the heat exchanger technologies still used in tap and warm water applications leak traces of nickel and copper into water supplies over time, Alfa Laval is now addressing this challenge. The new Alfa Laval AlfaNovaTW, with the patented fusion bonding technology, is a 100 percent stainless steel construction which thereby eliminates the risk of contaminating the tap water by heavy metals.

Alfa Laval AC74

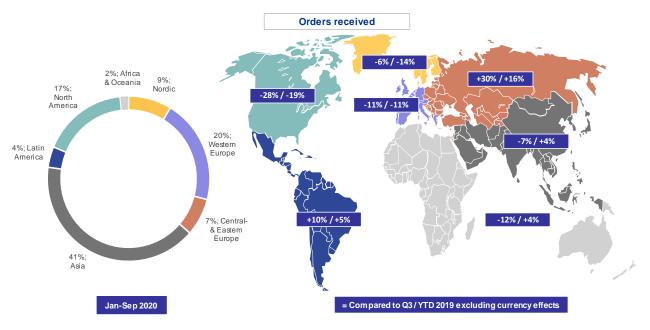

Alfa Laval AC74 brazed plate heat exchangers offer increased sustainability for cooling duties and represents a new generation of brazed plate heat exchangers. Engineered as a flexible solution for air conditioning and process cooling duties, the AC74 includes unique technologies developed to improve energy efficiency and enable the use of refrigerants with low global warming potential (GWP), such as:

- DynaStatic[™], a flexible distribution system that can be tailored to match the properties of the media in question, to ensure a perfect fit, for example, with low-GWP refrigerants. By ensuring ideal distribution for the media, DynaStatic further contributes to higher efficiency of the AC74 heat exchangers.
- FlexFlow[™], a patented asymmetrical plate design that enables more efficient thermal transfer through optimized pressure drop and increased turbulence.
- IceSafe, which ensures controlled, non-destructive freezing when operating with sub-zero media
- PressureSecure providing for dependable operation at pressures up to 49 bar.

26

Information by region

Western Europe including Nordic

Order intake in the region declined in the third quarter compared to the corresponding quarter last year. The development in base business* was weak except for Nordic and France. Energy contributed with a large order. Spain and France showed good growth. Service order intake grew in Food & Water.

Central and Eastern Europe

The region reported a solid third quarter, driven by a strong performance across the three divisions. A good order intake in Russia and Turkey combined with a strong base business contributed to a good overall growth for the region. The service business grew in Energy and Food & Water.

North America

The region contracted compared to the same quarter last year. The base business was clearly impacted by lockdowns and the order intake was weak in all three divisions. Service order intake in mainly Marine decreased.

Latin America

Latin America had a strong quarter. The base business grew in Brazil while Mexico and Argentina had a positive development. Service grew in Food & Water and Marine.

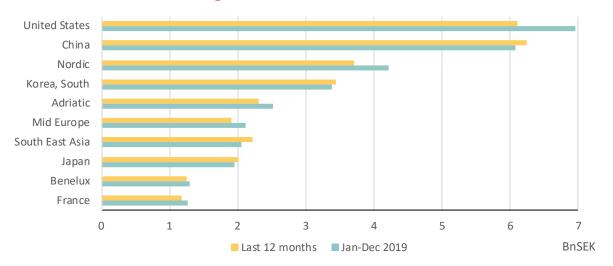

Asia

Asia declined compared to the same quarter last year. From a country perspective, the biggest declines were found in India and South Korea. China benefitted from a positive development for Food & Water, but not enough to compensate for the decline in Energy and Marine. Singapore and Japan grew on pumping system orders. The order intake for service was lower in most countries except China.

Africa and Oceania

The region declined in the third quarter because of lower order intake in Energy and Marine compared to the same period last year. Food & Water, however, grew. Marine service had a good order intake in Africa.

Correction of error in the income statement for prior quarters 2020

A classification error in the income statement in Alfa Laval's interim reports during 2020 has been identified and corrected. "Comprehensive income" for each period is not affected, but the error has meant that financial measures higher up in the income statement have not become correct, which in turn among other things have meant that "Earnings per share" has been stated at too high amounts. For the first six months 2020 "Earnings per share" should rightfully amount to SEK 4.68, which is SEK 0.82 lower than the previously reported figure. The equity is not affected.

In the Group consolidation for the third quarter 2020 a classification error has been detected in the income statement for prior quarters 2020. Realized and unrealized exchange differences concerning loans that constitute a hedge of net assets in foreign currency are normally booked against other comprehensive income. The reversal of unrealized exchange losses at December 31, 2019 has in connection with loans maturing during 2020, however, due to a mistake, only partly been booked against other comprehensive income in order to meet the realized exchange loss in connection with the maturity of the loan. This has meant that the items have been reported gross instead of net, which is incorrect.

The correction now performed means the following: Unrealised financial exchange differences of SEK 129 million in Q1, SEK 306 million in Q2 and SEK 435 million for the first six months have been moved from "Interest income and financial exchange gains" to "Translation difference" in "Other comprehensive income". The corresponding tax of SEK -28 million in Q1, SEK -65 million in Q2 and SEK -93 million

26

for the first six months have been moved from "Taxes" to "Deferred tax on other comprehensive income". This affects "Result after financial items" with SEK -129 million in Q1, SEK -306 million in Q2 and SEK -435 million for the first six months. "Net income" is affected with SEK -101 million in Q1, SEK -241 million in Q2 and SEK -342 million for the first six months. "Other comprehensive income" is affected with SEK 101 million in Q1, SEK 241 million in Q2 and SEK 342 million for the first six months. The effect on "Net income" is attributable to the owners of the parent. This in turn means that "Earnings per share" is decreased by SEK 0.24 in Q1, SEK 0.58 in Q2 and SEK 0.82 for the first six months. The return on equity is decreased to 19.6% in Q1 and 18.0% in Q2.

As stated, this relates to a classification error within the income statement for each period. "Comprehensive income" and "Equity" for each period are thus not affected.

Acquisitions and divestments of businesses

On July 13, 2020 Alfa Laval announced a recommended public cash tender offer for all shares in Neles. Alfa Laval AB (publ) and Neles Corporation entered on July 13, 2020 into a combination agreement, pursuant to which Alfa Laval will make a voluntary recommended public cash tender offer for all issued and outstanding shares in Neles. Neles' shareholders will be offered a cash consideration of EUR 11.50 for each issued and outstanding share in Neles, valuing Neles' total equity at approximately EUR 1,727 million. The members of the Board of Directors of Neles who participated in the decision-making unanimously decided to recommend that the shareholders of Neles accept the tender offer.

Cevian Capital, who holds approximately 10.9 percent of the issued and outstanding shares in Neles, has on customary conditions irrevocably undertaken to accept the tender offer. The completion of the tender offer is subject to Alfa Laval obtaining all necessary regulatory approvals and that the tender offer has been accepted with respect to shares representing, together with shares otherwise acquired by Alfa Laval prior to or during the offer period, more than 2/3 of the issued and outstanding shares and votes in Neles. In a press release on October 15, 2020, Alfa Laval announced that the acceptance level condition is lowered to more than 50 % of the issued and outstanding shares and votes in Neles. Should Alfa Laval obtain more than 90% of the issued and outstanding shares and votes in a accordance with the Finnish Companies Act to acquire the remaining shares in Neles, and thereafter to cause Neles' shares to be delisted from Nasdaq Helsinki as soon as reasonably practicable. Should Alfa Laval obtain less than 90% but more than 50% of the issued and outstanding shares in Neles, and thereafter to cause Neles' shares to be delisted from Nasdaq Helsinki as soon as reasonably practicable. Should Alfa Laval obtain less than 90% but more than 50% of the issued and outstanding shares in Neles, and thereafter to cause Neles' shares to be delisted from Nasdaq Helsinki as soon as reasonably practicable. Should Alfa Laval obtain less than 90% but more than 50% of the issued and outstanding shares and votes in Neles, Alfa Laval would assess alternatives to acquire the remaining shares in Neles over time.

The tender offer will be financed through a combination of Alfa Laval's own funds and debt facilities from SEB. Alfa Laval has secured fully committed debt financing from SEB on a customary certain funds basis, and the availability of the debt financing is subject only to the completion of the tender offer and certain conditions that are customary for a certain funds financing arrangement of this kind. Alfa Laval's obligation to complete the tender offer is not conditional upon availability of financing.

On August 12, 2020 Alfa Laval published a tender offer document with detailed information about the tender offer and information on how to accept the tender offer. The offer period commenced on August 13, 2020 and was set to expire on October 22, 2020. In a press release on October 15, 2020, Alfa Laval announced that the offer period is extended to October 30, 2020, unless extended further in accordance with the terms and conditions of the tender offer and applicable laws. The tender offer is currently expected to be completed during the fourth quarter of 2020.

As a response to Alfa Laval's press release on October 15, 2020 Neles in a press release on October 19, 2020 communicated that the Board of Directors continue to recommend the tender offer by Alfa Laval.

Alfa Laval has identified the industrial flow control market as a key growth area. The transaction enables Alfa Laval to considerably strengthen its presence in the large industrial flow control space where the company currently offers mainly energy efficiency solutions. On the other hand, Alfa Laval believes there are several areas where being part of the Alfa Laval Group can make a significant contribution to the future development of Neles, such as leveraging Alfa Laval's existing global platform. Neles' Finnish footprint will be completing Alfa Laval's Nordic platform. Neles is a global leader in flow control solutions and services. The Company's valves and valve automation technologies are known for quality, reliability and highest safety. Neles started trading as an independent company on July 1, 2020 following the partial demerger of Metso Corporation. The transaction is expected to result in significant benefits for stakeholders, including creation of shareholder value for both Neles and Alfa Laval shareholders. Alfa Laval believes that there is a strong strategic and cultural fit in the transaction.

Currently Neles has about 2,900 employees in over 40 countries. During 2019 Neles had an order intake of EUR 681 million, net sales of EUR 660 million and an adjusted EBITA of EUR 97 million.

A smaller operation, WCR Benelux BV in the Netherlands, was acquired on July 1, 2020.

The operations and net assets of DSO Fluid Handling Inc in the U.S. were divested on August 28, 2020.

Parent company

The parent company's result after financial items for the first nine months 2020 was SEK 410 (616) million, out of which dividends from subsidiaries SEK 413 (633) million, net interests SEK -0 (0) million, realised and unrealised exchange rate gains and losses SEK 0 (1) million, costs related to the listing SEK -4 (-4) million, fees to the Board SEK -6 (-6) million, cost for annual report and annual general meeting SEK -1 (-2) million and other operating income and operating costs the remaining SEK 8 (-6) million.

Owners and shares

Owners and legal structure

Alfa Laval AB (publ) is the parent company of the Alfa Laval Group. The company had 43,980 (40,383) shareholders on September 30, 2020. The largest owner is Tetra Laval B.V., the Netherlands, who owns 29.1 (29.1) percent. Next to the largest owner, there are nine institutional investors with ownership in the range of 5.6 to 0.7 percent. These ten largest shareholders owned 50.5 (53.2) percent of the shares.

Nomination Committee for the Annual General Meeting 2021

In accordance with a resolution taken at the Annual General Meeting of Alfa Laval AB on April 23, 2020, the Chairman of the Board, Dennis Jönsson, has contacted the largest shareholders to constitute the Nomination Committee in preparation of the Annual General Meeting 2021. The following persons have accepted to form the Nomination Committee: Jörn Rausing (Chairman of the Committee, Tetra Laval), Ramsay Brufer (Alecta Pensionsförsäkring), Anders Oscarsson (AMF-försäkring och Fonder), Jan Andersson (Swedbank Robur Fonder) and Per Trygg (SEB Fonder).

The Annual General Meeting of Alfa Laval AB will be held at Scandic Star Lund, Glimmervägen 5, Lund, Sweden, on Tuesday April 27, 2021, at 16.00 (CET).

Shareholders who wish to submit proposals for the Nomination Committee in preparation of the Annual General Meeting can turn to the Chairman of the Board of Alfa Laval AB, Dennis Jönsson or to the other shareholder representatives. Contact can also be made directly via E-mail to: valberedningen@alfalaval.com.

Risks and other

Material factors of risk and uncertainty

The main factors of risk and uncertainty facing the Group concern the price development of metals, fluctuations in major currencies and the business cycle. It is the company's opinion that the description of risks made in the Annual Report for 2019 is still correct, with the exception of the consequences of COVID-19, which are described below.

Consequences of COVID-19

Alfa Laval has implemented a broad cost reduction program with the objective of reducing fixed costs with SEK 1 billion on a 12-month running basis. The program is well on track and the first financial effects became visible as of April. An important part of the cost reduction program is related to the flexibility of various working hour reduction schemes in countries like Italy, Germany, France and Sweden. In Sweden specifically, the company has reduced the working time with 40 percent for approximately 800 white-collar employees, between May and August. The received support for reduced working hours in Sweden has however not been reported in the P&L but has instead been balanced due to the uncertainty around the conditions for the support. The Board of Directors withdrew the dividend proposal for 2019 as a measure to preserve cash.

In a press release on March 17, Alfa Laval expressed concerns regarding the business climate from the second quarter 2020 and onwards due to the negative effects of the COVID-19 pandemic.

Alfa Laval has global and local crisis teams in place for close monitoring and swift response to changes in the situation to secure the health and safety of our employees.

Alfa Laval has a global footprint with 39 major manufacturing units across Europe, Asia, the US and Latin America. The company is a supplier to critical infrastructure industries and has permission to continue production in countries with restrictions and lockdowns. The company has well-established business continuity plans and a global supply chain with alternative sourcing solutions for most products and services and close collaboration with key suppliers. Sourcing shortages for components due to lock downs have not been a critical problem during the year.

Asbestos-related lawsuits

The Alfa Laval Group was as of September 30, 2020 named as a co-defendant in a total of 641 asbestos-related lawsuits with a total of approximately 641 plaintiffs. Alfa Laval strongly believes the claims against the Group are without merit and intends to vigorously contest each lawsuit.

Based on current information and Alfa Laval's understanding of these lawsuits, Alfa Laval continues to believe that these lawsuits will not have a material adverse effect on the Group's financial condition or results of operation.

Accounting principles

The interim report for the third quarter 2020 is prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act. The accounting principles are according to IFRS (International Financial Reporting Standards) as adopted by the European Union. In the report, alternative performance measures are used. See the annual report 2019 for definitions. Alfa Laval follows the Guidelines on Alternative Performance Measures issued by ESMA (European Securities and Markets Authority).

"Q3" and "Third quarter" refer to the period July 1 to September 30. "Jan-Sep" and "First nine months" refer to the period January 1 to September 30. "Jan-Dec" and "Full year" refer to the period January 1 to December 31. "Last 12 months" refers to the period October 1, 2019 to September 30, 2020. "The corresponding period last year" refers to the third quarter 2019 or the first nine months 2019 depending on the context.

"Currency effects" only relate to translation effects, whereas "foreign exchange effects" also relate to transactional effects. "Mix" in the operating income bridge also includes a price effect. Comparison distortion items are reported in the comprehensive income statement on each concerned line but are specified on page 4.

The accounting and valuation principles of the parent company comply with the Swedish Annual Accounts Act and the recommendation RFR 2 Accounting for legal entities issued by the Council for Financial Reporting in Sweden.

Forward-looking statements

This interim report contains statements that, to the extent they are not historical facts, constitute "forward-looking statements". Forward-looking statements include statements concerning plans, expectations, projections, objectives, targets, goals, strategies, future events, future revenues or performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, competitive strengths and weaknesses, plans or goals relating to financial position, future operations and development, business strategy and the trends in the industries and the political and legal environment and other information that is not historical information. In some instances, they can be identified by the use of forward-looking terminology, including the terms "believes", "intends", "may", "will" or "should" or, in each case, their negative or variations on comparable terminology. By their very nature, forward-looking statements involve inherent risks, uncertainties and assumptions, both general and specific, and risks exist that the predictions, forecasts, projections and other forward-looking statements will not be achieved. Given these risks, uncertainties and assumptions, investors are cautioned not to place undue reliance on such forward-looking statements. Any forward-looking statements contained herein speak only as at the date of this interim report.

The interim report has been issued at CET 7.30 on October 22, 2020 by the President and Chief Executive Officer Tom Erixon by proxy from the Board of Directors.

Lund, October 22, 2020,

Tom Erixon President and Chief Executive Officer Alfa Laval AB (publ)

Review report

Introduction

We have reviewed the summary interim financial information (the interim report) of Alfa Laval AB (publ) as of September 30, 2020 and the nine months' period then ended. The Board of Directors and the President are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements ISRE 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the International Standards on Auditing and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report, in all material aspects, is not prepared for the Group in accordance with IAS 34 and the Swedish Annual Accounts Act and for the Parent company in accordance with the Swedish Annual Accounts Act.
