

Introduction:

The gas analyser module in your Alfa Laval PureSOx system is required for accurate SO_x and CO₂ measurements and therefore compliance.

Why choose refurbished?

Opting for a refurbished gas analyser module is a smart, cost-effective, and sustainable choice. It reduces operational costs without compromising performance. By reusing quality components, we minimize waste and resource use—supporting Alfa Laval’s sustainability goals while helping you maintain compliance and reliability.

It is not possible for end users to repair or replace parts on the analyser themselves. Repairs require specially trained personnel, as the analyser must be carefully inspected, cleaned, realigned, and adjusted after any component replacement. Finally, each unit is calibrated and tested over time to ensure full functionality.

Exchange Service (Hot Swap)

Alfa Laval offers an exchange service for gas analyser modules, enabling quick replacement without interrupting system operation. A refurbished unit is shipped to you and can be installed onboard by the crew or an Alfa Laval service engineer. See pricelist for Heat and Gas Systems Service Engineer.

The used module must then be returned to Alfa Laval.

The refurbished module will be shipped (in Pelican Case) within 1 week of receipt of order with a warranty of 1 year.

Please contact your Alfa Laval sales company for the pricing details of the below options:

Option	Description
1.	Module exchange - returned within 1 month
2.	Module exchange - returned within 3 months
3.	Module exchange - returned within 6 months
4.	New module – no exchange

Exchange Programme: Gas analyser module via Service Agreements

Alfa Laval will proactively coordinate shipment of serviced gas analyser modules and schedule Alfa Laval Service Engineers to carry out exchange and installation on a biennial basis. This option is available via our service agreements. Benefit from fixed pricing and extended warranty for the duration of the PureSOx Service Agreement.

Please contact your Alfa Laval sales company.

Return requirement

To ensure continued availability and avoid penalties, the exchanged analyser must be returned at the first port of call or at the earliest convenient opportunity. Failure to return the unit may result in additional costs.

Please re-use the Alfa Laval Pelican case for the return shipment.

See full RMA instructions and return label for more information.

Disclaimer:

Alfa Laval shall have no responsibility for deterioration or damage caused to the equipment by ordinary wear and tear, unintended use, misuse, abuse or improper storage, improper installation, improper maintenance, improper operation and/or improper repairs by the buyer or by third parties.
