

Modification for Aalborg burners – flexible fuel oil hose

Vertical hose mounting for reduced maintenance

The flexible fuel oil hose modification kit contains everything needed for vertical mounting of the flexible fuel oil hose on your Alfa Laval Aalborg KBSD/A burner. Mounting in a vertical position will decrease the tension placed on the hose when the lance is in movement.

Relieving tension in this way will extend the lifetime of the flexible fuel oil hose by at least 25 times. As a result, the modification will eliminate both leakage problems and excessive hose consumption.

The modification is a simple, one-time action that can easily be handled by the crew on board.

Benefits

- Reduced burner maintenance
- Lower maintenance costs
- Reliable oil supply without leakage

Scope of service

- **Ready-to-install kit**

The flexible fuel oil hose modification is provided as a standard kit with everything needed for complete installation.

- **Installation assistance**

The modification is easy to perform and can therefore be done by the crew on board. Naturally, it can also be installed by an Alfa Laval service engineer.

Scope of supply

The modification kit contains everything needed to mount the burner's flexible fuel oil hose vertically:

- Bracket
- Oil pipe for vertical connection

The modification is specific to Aalborg KBSD/A burners used on oil-fired boilers.
